

## EPWORTH SLEEPINESS SCALE (ESS)

The following questionnaire will help you measure your general level of daytime sleepiness. You are to rate the chance that you would doze off or fall asleep during different routine daytime situations. Answers to the questions are rated from 0 to 3, with 0 meaning you would never doze or fall asleep in a given situation, and 3 meaning there is a very high chance that you would doze or fall asleep in that situation.

How likely are you to doze off or fall asleep in the following situation, in contrast to just feeling tired? Even if you haven't done some of the activities recently, think about how they would have affected you.

Use this scale to choose the most appropriate number for each situation:

0 = would never doze

1 = slight chance of dozing

2 = moderate chance of dozing

3 = high chance of dozing

IT IS IMPORTANT THAT YOU CIRCLE A NUMBER (0-3) FOR EACH SITUATION.

---

SITUATION	CHANCE OF DOZING			
Sitting and reading	0	1	2	3
Watching television	0	1	2	3
Sitting inactive in a public place (theater/meeting)	0	1	2	3
As a passenger in a car for an hour without a break	0	1	2	3
Lying down talking to someone	0	1	2	3
Sitting and talking to someone	0	1	2	3
Sitting quietly after lunch (with no alcohol)	0	1	2	3
In a car, while stopped in traffic	0	1	2	3
